Cockpit

**EFFORTLESS
PACKAGING**

WITH THE BEST FLIGHT CONTENT WORLDWIDE

Dear Partners,
Dear Colleagues,

Do you want to provide your customers with personalized and comprehensive advices without having to carry out complicated research and bookings?
We have the perfect solution!

Our Cockpit booking world offers worldwide flight content in an easy-to-use booking interface. In the Cockpit you get everything you need!

Cockpit. Effortless packaging. With the best flight content worldwide.

The only website with so much content.

With a single search, you get not only results from Amadeus, Sabre and other GDS systems, but also content from direct airline connections and, of course, low-cost fares. Your advantage: Work with an easy-to-use user interface which can be customized with just a few clicks. All the content is behind it: a unique flight database including specials, international fares, direct connections and many more.

Package and combine what you and your customers want!

Cockpit Holidays offers the perfect expansion of the flight portfolio into land-based components. In the Cockpit booking world you can now combine hotels, transfers, rental cars and more land-based services with the best flight content. We will take on the tour operator role and liability!

Prefer to book flights the way you are used to?

Keep working with cryptic commands and keyboard shortcuts like in Amadeus and Sabre: „My GDS“ makes it possible! My GDS is a web-based application within the Cockpit booking world for GDS professionals.

Want to offer more services and retain customer loyalty? And earn from it?

„MyCockpit“ is the website for your customers. Here travelers can manage their bookings, keep an eye on departure dates and gates, and independently book fee-based add-ons such as seat and baggage.

The highlight: Do nothing, and you will still earn money!

With MyCockpit, passengers no longer have to visit airline websites. Your customers and their data remain with you.

Full service:

365 days a year, we are there for you 24/7. Local teams and experienced tariff specialists are available everyday round the clock.

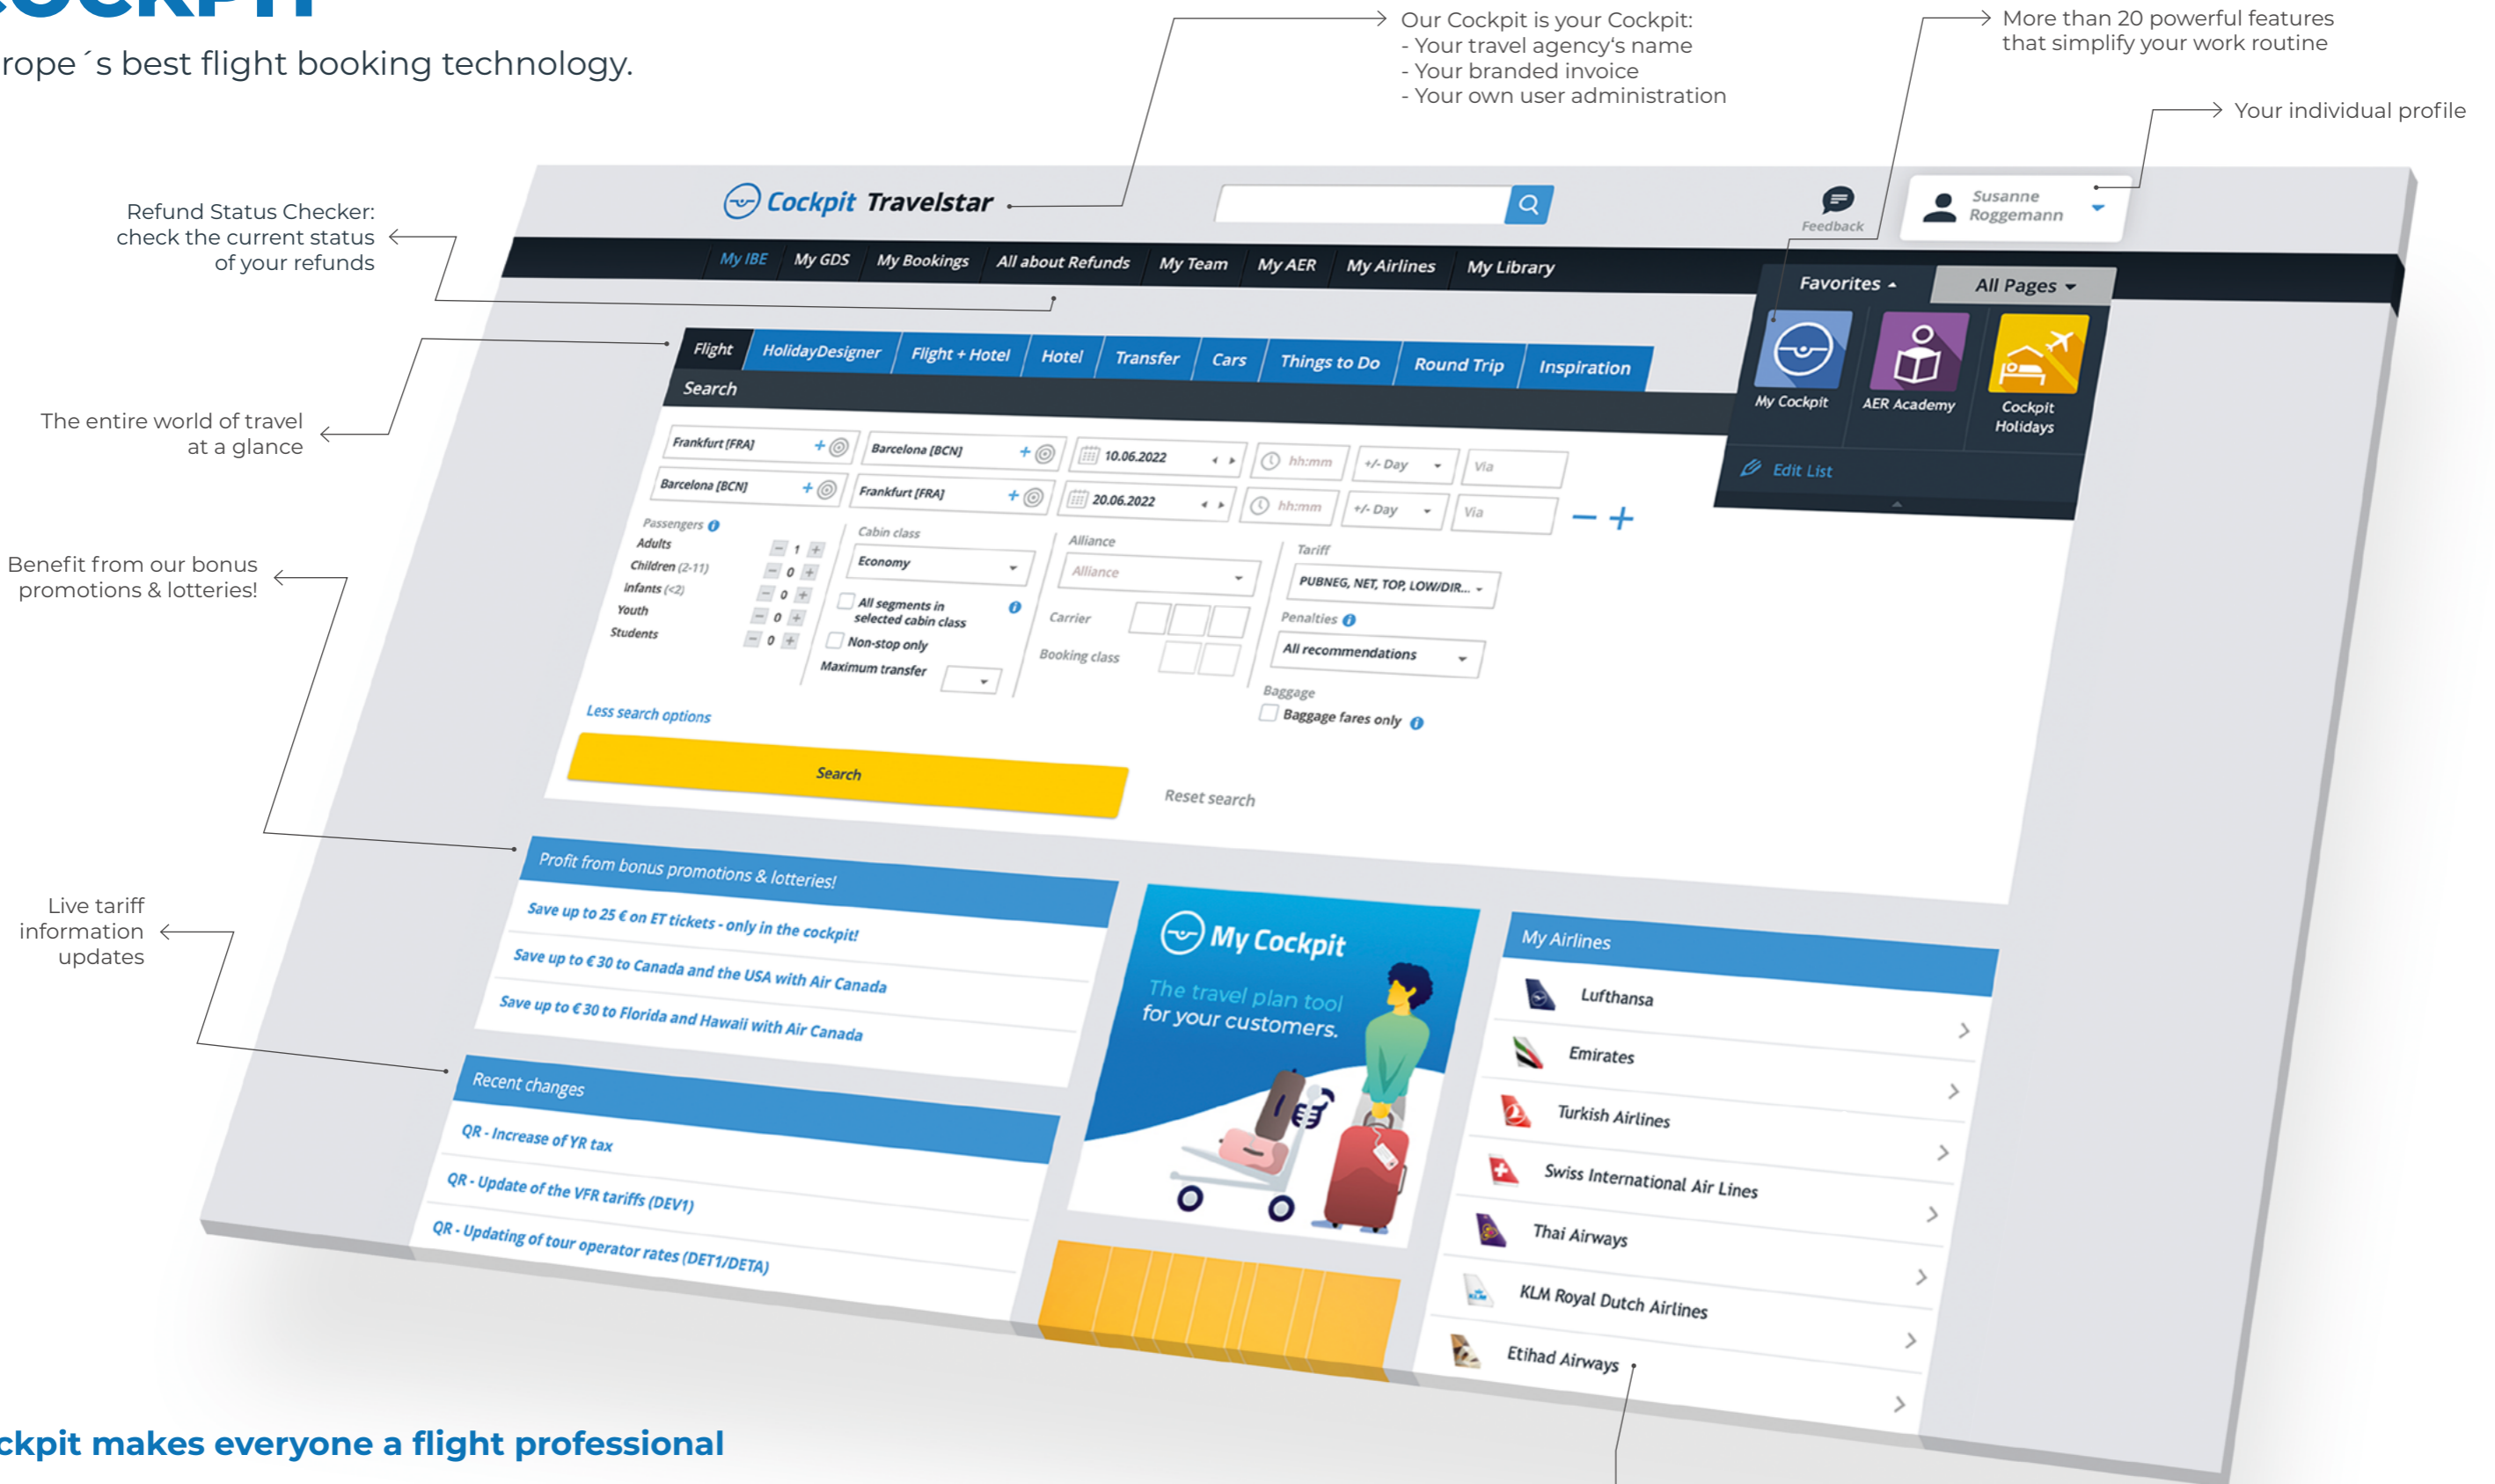

You offer your customers something that is not available on the Internet - your specialist knowledge and your competent advice. Concentrate on that, we do the rest!

Best Regards,
Your AERTiCKET Team

COCKPIT

Europe's best flight booking technology.

Cockpit makes everyone a flight professional

Everything at a glance, simple intuitive operation, best content, tariffs from more than 100 countries, add-ons (such as seats, baggage & many more) can be booked directly.

Cockpit Holidays: Mix and match all the travel modules and we take on the role of tour operator for you. Effortless packaging.

Everything you need to know about all airlines, such as tax refunds, specials & peps, Frequent Flyer agreements and more useful information

COCKPIT FLIGHTS

With the best content worldwide.

Set your own mark-up before or during booking

Only in Cockpit: dynamic filters and real-time ranking that make search super easy

LH SMART OFFER
with Continuous Pricing
(only in Cockpit, not the GDS)

Your calculation, your settings and useful „Tips & Tricks“

Compare up to five offers simultaneously

Up-to-date rates and tariffs (no cache data!)

Bye, bye FQD: All tariff rules and regulations at one glance & click

Our Global Fares are exclusively available in Cockpit and no other reservation system

EXCLUSIVE CONTENT

- All tariffs in one single search (IATA/Nego/Tourop/Conso/Ethnic/Low-Cost)
- + 100 countries, all direct interfaces (incl. NDC): such as LHG, AF/KL, BA/IB, EW, SR, A3/OA, DE, SQ, WY, AY, S7, ...
- Profit from unlimited flight combinations thanks to virtual interlining: 15 billion flight combinations possible!
- Massive time reduction in searching, up-selling and cross-selling
- Only in Cockpit, not in your GDS: exclusive Global Fares (cheaper prices, better availabilities)
- Save up to 80 Euro, thanks to LH-Group direct connection (special rates) as well as the 16 Euro LH DCC fee

ADDED VALUE FOR YOU

More service, more profit.

Offer your customers the best service and earn more at the same time. Book seats, additional baggage, upgrades and more with just one click. We make cross-selling a breeze!

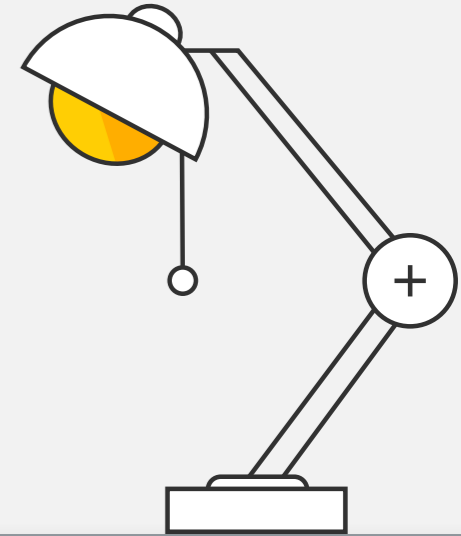

The screenshot shows a flight booking interface with the following details:

- Price:** 407,92 € incl. 157,92 € Tax
- Flight Details:** LH 1138 (Mon, 10 JUN, FRA - BCN, 21:05 - 23:05, 02:00 h, P/Busi. / 321) and LH 1139 (Thu, 20 JUN, BCN - FRA, 06:50 - 09:00, 02:10 h, P/Busi. / 321).
- Upsell Table:**

	AER S Economy	AER M Economy	AER L Economy	AER+ M Business	AER+ XL Business
Airline Fare Family	LIGHT	CLASSIC	FLEX	BUSINESS SAVER	BUSINESS
Price difference	+/- 0,00 €	+ 40,00 €	+ 140,00 €	+ 250,00 €	+ 330,00 €
Baggage	0PC	1PC	1PC	2PC	2PC
More information	Info	Info	Info	Info	Info
- Navigation:** Book now, Offer, Upsell, Seats, Extras, Rules.

Callouts from the interface:

- Book now:** You can print out an offer or send it as a pdf file
- Offer:** Surcharge for a baggage item
- Upsell:** Surcharge in total for Business Class
- Seats:** Book available add-ons for this flight

Just what your customer needs.

Pick the right add-ons for your customers.

Seats and baggage (own surcharge possible)

Sustainable: show and compensate CO₂

Parking discount at the airport

Access to airport lounges

Train to flight

Transfers

Save valuable time

Data transfer to all common mid-office systems.

My Cockpit

MyCockpit, a travel plan, a travel assistant, a travel shop - additional sales at any time.
Online. Digital. For every device.

Thanks to MyCockpit's itinerary, you stay up to date at all times. Flight routes, time changes, terminal changes or other updates of your flights are available in real-time. And you can check updates from anywhere, on any device, whether you're working on your laptop, sitting with your tablet on the couch or using your smartphone on the road to the airport. You can use MyCockpit to upgrade your trip by reserving seats, booking additional baggage, entering your frequent flyer number or by submitting special meal requests to the airline. All this is in one single application and, of course, cross-GDS.

The highlight: If your customers book seats, baggage or other extras in MyCockpit, you make money. All sales in MyCockpit are commissioned, and we pay this commission to you as the seller of the flight.

Reserve a seat

COCKPIT API

The whole world is at your disposal.

The Cockpit API offers international travel portals, tour operators and other interested travel companies direct access to the entire air content of our Cockpit:

1. Global Fares from more than 100 countries - nobody offers the same!

- More availabilities
- Attractive and competitive prices
- Foreign airline commissions
- Local air fares that are only available within the particular markets

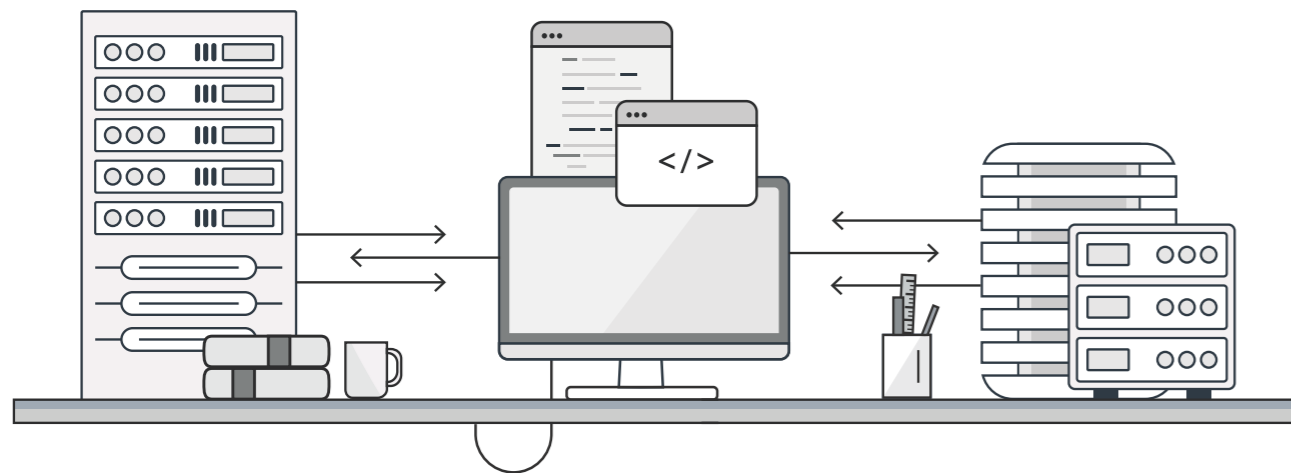

2. Direct Connect Content

In addition to the Global GDS content, the Cockpit API also offers content from NDC and direct-connect sources. Farelogix, for example, is integrated, so you have access to Luft-hansa content via the Cockpit API at extremely attractive and preferential prices. We are constantly working on expanding this content.

3. Low-cost Content

Of course the Cockpit API also offers low-cost carrier content, like for example from Eu-rowings, Condor, SunExpress, Transavia, Easyjet, Ryanair etc.

The Cockpit API is easy and quickly to be implemented and provides you with a valuable competitive advantage through the offered full content.

What is an API?

API is the short name for Application-Programming-Interface. An interface is a connection between one web page (or database) and another web page (or database).

MY GDS

The free web application for GDS professionals.

- ✓ Edit Cockpit reservations like in GDS - e.g. repost, split
- ✓ Add messages and data to Cockpit IBE bookings - e.g. RMs, OSIs, SSRs, FFN, APIS, TSA
- ✓ Can be used with any device (computer, tablet or smartphone)
- ✓ Standard Smartkeys are preassigned by us, but agencies can also assign their own Smartkeys
- ✓ The choice is yours - each GDS booking can be processed with Sabre or Amadeus commands
